

# Private Agentic AI for Business Productivity

## Jumpstart your AI journey with a Private Secure, Multi-lingual AI Assistant, with Proven Productivity Solution

**Kickstart AI Journey  
Instantly with Agentic AI  
as a Service**

**Access to Proven Use  
Cases (Deep Search,  
Analysis, Productivity)**

**Multi-lingual Agentic AI  
Assistant across  
organization**

**Advanced  
Document Management  
System**

**On-premise Solution  
with Data Security &  
Privacy**

Start small, leverage proven use cases, simplify AI adoption, while ensuring security and transparency.

- 1 Start Small, Quick Wins, Repeat**  
Get started with palatable investment
  - Expose organization to start with impactful productivity use cases
  - Effective TCO & ROI realization

- 2 Focus on Proven Use Cases**  
Build use cases that have been proven to work in real life
  - Document analysis
  - Work productivity
  - Sentiment analysis

- 3 Keep it Simple, Adapt to AI**  
AI is the future
  - Allow the organization to familiarize with fundamental AI skillset
  - Remove the complex components; no-code implementation of AI Agents

- 4 Secure and Transparent**  
Take control of your data
  - Ensure data privacy are not exposed to public
  - Allow transparency for organization to use AI with ease of mind

**Rethink  
Approach & Strategy  
for Success**

Embarking on AI implementation can be challenging in the face of high costs, talent gaps, evolving tech, deployment hurdles, uncertain ROI, and data security concerns.

**Chasm of AI  
Journey**

**High Investment  
Cost**

**Rapid Evolution of AI  
Technology**

**80% of AI Projects Do  
Not Go-Live**

**TCO & ROI  
Justification**

**AI Operations  
Lifecycle**

### What is Agentic A.I.?

AI systems that can act independently, make decisions, and automate tasks based on set goals. These systems analyze data, optimize workflows, and improve efficiency with minimal human input, helping businesses streamline operations and enhance decision-making.

#### Disclaimers:

- AI-generated content may contain discrepancy. User input is still required to ensure compliance
- AI does not have consciousness, emotions, or independent thought
- LLMs can achieve high accuracy in structured tasks but cannot guarantee 100% reliability. Human verification is always recommended

# Private Agentic AI for Business Productivity

## Launching Pad to Success

A Unified Platform for Multimodal Search & Data Analysis with Generative AI and AI Agents.

### AI in a Box Starter Bundle

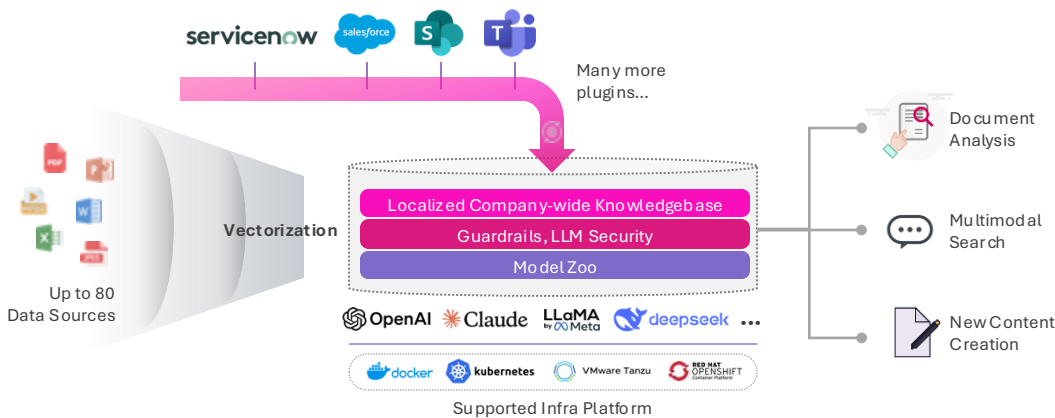

- 1 x Enterprise Server with 2 x AMD GPU
- AI subscription for 1 Year (10 Concurrent Requests), 5 default connectors, 24/7 technical support
- Professional services:
  - Hardware & AI solution bring-up services
  - Derive & configure 1 x Use Case up to 30 mandays (to be defined)
  - Business Analyst visit (monthly, valid for 12 months)

#### Disclaimers:

- 10 concurrent requests only apply to DeepSeek R1-32B
- On-premise version does not leverage Google Vision, cloud-based LLM and OCR
- Additional concurrent request requires additional hardware resources and software subscription
- In multi-GPU setup, GPU bandwidth limitation can be leveraged to enhanced performance, however it is not mandatory

## A Platform Driven Approach

Data sources are processed and vectorized into Agentic AI platform as part of knowledge base. This enables advanced search, data analysis, and content generation.

## Real-World Uses of AI

AI is reshaping industries by automating tasks, boosting creativity, improving decisions, increasing efficiency, cutting costs, and driving innovation

## Starter Bundle Specification

### Medium (16-20 CCU) / Large (32-40 CCU) Setup:

CPU	Intel Xeon Gold 6526Y (16 Core)	
Memory	128GB	
Storage	4 x 3.84TB	
GPU	2 or 4 x AMD MI210 300W PCIe, 64GB Passive, Double Wide	
	Services	Description
1	Base hardware infra setup	Mount, setup and integrate baseline server equipment into enterprise network fabric
2	Agentic AI platform setup	Deploy, configure and validate Agentic AI platform
3	Use case setup	Derive, design and configure up to 1 use case, with up to 30 mandays efforts
4	Adoption	Exploration and guidance by Business Analyst (monthly, valid for 12 months)

Note: Terms & conditions apply.

## Competitive Advantage, Yet Complementary

Compete by excelling in enterprise productivity features, while remaining complementary, enabling interoperability for diverse enterprise workflows.

Search across multiple repositories, systems, data sources	●	-	-
Analysis, Summarization, Information Extraction & Insights	●	◐	◐
Multimodal (Audio, video, image, text) Content Support	●	◐	◐
Accuracy Fine-Tuning and Optimization Layer	●	-	◐
Multi-LLM (including Local On-Premises LLMs)	●	-	-
Agentic AI Agents powered on Gen AI, Machine Learning & LAM (Large Action Models)	●	-	-
Enterprise Grounding : Multi-tenancy, Access Control, Workflow	●	-	-
Attractive Concurrent user licensing model for wider adoption	●		-

Note: As of Mar 2025

## Who Are We

Established in 2014, is head-quartered in Malaysia, to serve the ASEAN region.

### Experience & Expertise

We assess, design, setup robust, scalable cloud infrastructure & development platform for business critical & cloud native apps

### Width & Depth

We understand and appreciate end-to-end cloud infrastructure, DevSecOps & business process

### Service 2U

We believe working proximity, onsite or remote, is key to successful delivery. Key is in effective communications
